INSURANCE FOR PEACE
There is no guaranty of permanent peace so long as great nations continue to threaten the security of others.

Through the Munich conference between England, France, Italy and Germany seemed to assure that no general European war will break out in the near future, the attitude of the dictatorial governments toward the democracies is such that no far nation can rely on itself as a force for peace.

There is no doubt whatever, in the minds of students of world affairs, that the dictator-ridden nations both deny and hate the United States and its democratic principles.

From the frequent official statements in the government-controlled press of Germany, of Russia and of Italy. Once let those nations get rid of their democratic neighbors, it is more than likely they would try to win a foothold on this continent.

Now, more than ever, the old maxim is "time is money" to prepare for war is something to take seriously.

OUR WORLD OF INVENTIONS

The history of America has been the history of inventions. This nation was launched just as the steam engine had been invented.

That was the beginning of the Age of Power, and of what economists refer to as the Industrial Revolution.

In an enormous new country, the small population along the Atlantic Coast had to find means to combat the wilderness and develop the vast wealth of the land.

New nation grew so rapidly from poverty to riches that the inventiveness and practical ingenuity of Americans which enables our pioneers to do the things the cotton gin, the steamboat, the telegraph, the telephone, the automobile, the airplane and the radio are only a few of the inventions which have made America what it is today.

Hardly a year has passed without the introduction of some radically new invention which has made life easier and to provide more jobs for everybody.

To imagine world without typewriters, sewing machines, machines, harvesters, typewriting machines and a hundred other things which we now regard as commonplaces, and everyday life would be difficult indeed.

The process of invention is still going on. Within the next few years new inventions as revolutionary as any of earlier days have been developed and put to human bettering interest in governmental problems.

Those who know about such matters tell us that there are literally thousands of new inventions already patented, and that the rate of industry ready to be developed and marketed as soon as the owners are ready to put them into use.

Thousands of scientists and engineers are working in great industrial laboratories on still more inventions to make life easier and richer for everybody.

It is foolish to oppose the march of invention merely because some one makes a lot of money out of it. The man or institution who finds a way to simplify living, to make it more comfortable or beautiful, is entitled to the greatest reward that society is able to give him.

Four cars of fine hogs were sold in Dale County recently by 63 members of the club. The average hog sale for \$4,276.62. There were 372 head sold. This sale brings the total number of hogs sold to 14,674. The total income to \$160,742.50.

When you export your soil fertility you are exporting part of your farm's capital. No you can't send your soil and labor abroad for practice years in the future. You can afford to plow up your hillsides and sell your labor for five cents an hour when the value of the soil is being destroyed.

That Secretary of Agriculture Henry Wallace asks farmers regarding the domestic allotment plan that provides for unlimited cotton exports at whatever price the staple will bring.

LEGISLATURE HAD ONLY \$6,982,000 TO APPROPRIATE

State Chamber Makes Study of Alabama's Income and Reports Findings

Montgomery, Ala.—Only \$6,982,000 out of the State of Alabama's gross receipts for the fiscal year ending September 30th, 1937, were available for appropriation by the state legislature, according to a study of state receipts and disbursements made by the Committee on Government of the Alabama State Chamber of Commerce at the request of Mr. Benjamin Russell, president. Members of the state chamber government committee who made the study were: Gen. James H. Dugan, chairman; H. A. Dugan, Donald Scott, H. A. Dugan, J. W. Scott, and H. A. Dugan.

In releasing the report of the committee here today, Mr. Russell stated he requested the study because of apparently widespread confusion as to the amount of money actually available to the legislature.

"The figure of \$7,180,000 has frequently been given," Mr. Russell said, "as the state's income for the fiscal year, but that amount of money actually handled by the state, after eliminating departmental transfers to and from other departments, is only \$6,982,000."

Mr. Russell said that the state's income for the fiscal year is \$7,180,000. This amount is made up of the following items:

Gross receipts in \$71,544,000

OBITUARY—MEDLEY

The death angel visited the home of Mr. Carvin Medley of Elba and carried away a wife, mother and sister. She departed from this world October 22nd and fell asleep in the arms of Jesus. There will always be a vacant place in the home that can never be filled but we are hoping to meet her in that haven of rest some happy day.

She is survived by her husband and three children, a dear mother, three brothers, two sisters, and a host of relatives and friends.

The body was laid to rest in Mt. Pleasant cemetery with Rev. Mark Whiting, pastor of the Elba Church, officiating. Her husband and children is my prayer.

A FRIEND.
